Dimensions are approximate. Information provided in this brochure is representative of the actual products available at the time of printing. Due to our policy of continuous product development, the designs and specifications depicted are subject to change without notice. Please confirm all particulars with your consultant prior to purchase. Each product is covered by a limited warranty. Full terms and conditions are available from your sales consultant.

INSTALLATION

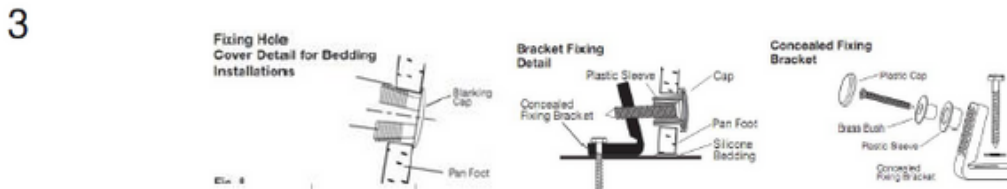

Note: All measurements for roughing-in should be taken from finished wall/floor. **Installation of this product is to be performed by a licensed plumber.**

S- TRAP requires a 140mm centre set out

- 2 Pan Fixing: As the product weighs in excess of 23kg, a silicon fixing is also optional as approved by the manufactures specifications. If fixing is only to be a asectic cured silicone, proceed to set 3
- 1-Position the pan onto the pan connector and mark fixing holes on the floor.
 - 2- Drill two holes in the marked positions on the floor. The diameter is dependent of the type of fixing system and floor finish.
- IMPORTANT – DO NOT USE THE PAN SCREM HOLES AS A GUIDE FOR DRILLING AS THIS MAY CRACK THE PAN.
- 3- Ensure that the area around the pan is clean.
 - 4- Run a bead of acetic cured silicon at a height of 8mm approximately fully around the foot of the pan which contacts the floor. *Use wedges around the foot of the pan if required to accommodate out of level flooring, note that the maximum height of acetic cured silicon can not be greater than 5mm between the floor and base of the pan.*
 - 5- Connect pan to the pan connector. If holes have been drill for optional fixings, fix now with suitable corrosion resistant screws.

Cleaning Recommendations

The high quality vitreous china finish on all sanitary ware can be maintained by simply using mild soapy water and wiping over. Sanitary ware should not be cleaned with abrasive materials e.g. steel wool/scourers. Do not use any corrosive or abrasive cleaning agents containing acids or scouring agents as this may lead to surface damage. Bleaches can also discolour seats and hinges and therefore should not be used. If your toilet has metal hinges they should only be cleaned with a mild liquid domestic cleaner, with soft soapsuds or Steel & Chrome cleaner. After cleaning, rinse with clean water and polish with a clean soft cloth.
