TAPWARE, SHOWERS & ACCESSORIES

A long-standing partnership

Choice Supplies and Fienza are proud Australian, family owned companies, brought together by shared values and a commitment to supporting Australian business.

A partnership built over 15 years

For more than 15 years, Choice Supplies and Fienza have worked side by side through a relationship built on mutual respect, reliable support and shared values.

As Australian family owned companies, both businesses understand the value of long-term partnerships, local knowledge and backing Australian industry.

Together we continue to support customers with quality bathware, dependable supply, and service they can trust.

& fienza®

Beautiful, quality Tapware

Cali mixers, tapware, showers & accessories are available in various styles and finishes. Our range of colours are applied using different technologies to ensure a finish that is both beautiful and long-lasting.

Solid Brass Construction

Made from solid brass, our tapware resists corrosion and bacteria, and are designed to withstand high water temperatures.

Lifetime Guarantee

Cali mixers, three-piece tapware and showers now come with a lifetime warranty on all structural components and Chrome finishes.

We also provide a lifetime warranty on Cali mixer cartridges, including an industry leading 15 years labour for residential premises.

PEX Split-Resistant Hoses

Each Cali mixer comes with split-resistant PEX hoses. Cross-linked polyethylene (PEX) hoses ensure silent water flow as they expand under pressure and resist splits or cracks. The PE material prevents corrosion, ensuring longevity and durability.

Electroplated Finishes

Electroplating involves applying a thin metal coating using electricity. The product is submerged into a solution containing metal ions, resulting in a smooth and durable finish. This process achieves a vibrant polished chrome or a smooth, non-reflective matte finish.

Chrome

A timeless, polished finish that instantly adds brightness and elegance to any space. Perfect for modern and traditional spaces, Chrome's stunning reflective finish complements bright whites, soft neutrals, or bold accents.

Matte White

A clean and fresh finish, Matte White works beautifully with pastel colours and coastal designs. Matte White brings a sense of calmness and simplicity without overpowering the space. It is particularly popular in Scandinavian designs, focusing on clean lines, minimalism and natural environments.

Matte Black

Bold and striking, Matte Black has become the popular choice for making a statement in a minimalist space. From contemporary styles to industrial designs, Matte Black is highly versatile and immediately draws attention, pairing well with exposed brick, concrete substrates and monochrome palettes.

PVD Finishes

PVD (Physical Vapour Deposition) is an eco-friendly process where a thin layer of metal coats the tapware using a vacuum and vaporised metal particles. This method creates a highly durable surface in a variety of rich, coloured finishes, allowing the tapware to retain its distinctive brushed appearance.

Brushed Nickel

Subtle and soft, Brushed Nickel has increasingly become one of the most versatile tapware finishes. With a gentle metallic sheen and subtle warmth, it pairs well with most colour palettes, particularly cool tones, earthy spaces and natural materials.

Gun Metal

If you're looking for a bold, edgy look for your space, Gun Metal adds a striking statement. With its moody grey sheen, it enhances modern interiors that feature light or dark colour schemes. The industrial aesthetic of Gun Metal pairs well with concrete, stone and other raw materials.

Brushed Copper

The earthy, opulent appearance of Brushed Copper instantly elevates the space. With its inviting warmth and luxurious sheen, Brushed Copper pairs well with wooden, stone and marble accents. A favourite for modern and traditional interiors, it complements neutral tones and muted green palettes.

Urban Brass

With an urban twist on the classic gold finish, Urban Brass instantly adds character and charm to the space. It is increasingly popular for vintage-inspired bathrooms, and enhances chic, modern spaces. Urban Brass works especially well with blues, greens, and muted beige tones.

Compliance & Certifications

Our tapware meets essential industry standards and recognised certification programs where required, including WaterMark and the Water Efficiency Labelling Scheme (WELS). These standards support compliance across residential and commercial projects.

Lead Free

From 1 May 2028, new Australian regulations require that only genuine lead-free certified products may be installed for potable (drinking water) use under the National Construction Code (NCC).

As part of our commitment to product safety and public health, our range of tapware has transitioned to lead-free brass or stainless steel.

This change eliminates the potential for lead exposure through drinking water and ensures every product meets the highest standards of quality and compliance.

Look out for Lead Free on the relevant product pages.

WELS Rated

Our tapware and showers are rigorously tested and awarded a WELS rating to confirm their water efficiency. These tests assess flow rate and overall water consumption, with higher star ratings indicating lower water use.

WELS applies only to products that deliver water directly—such as mixers, tapware, and showers—and does not apply to wall mixers, diverters, or other components that do not deliver water directly.

WaterMark Certified

Our tapware products are WaterMark certified in accordance with the Plumbing Code of Australia. This certification confirms that products are fit for purpose and comply with Australian plumbing requirements.

General Information

Cleaning & Care

Please use the basics when cleaning tapware.

- Wipe regularly using a microfibre cloth.
- For a deeper clean, mix warm water with a small amount of dish soap.
- Rinse thoroughly with clean water.
- Dry immediately after use. Mineral deposits can quickly build up if the tapware is left wet for too long.
- For limescale buildup, mix 50:50 white vinegar and warm water. Rinse and wipe immediately.
- We recommend using a microfibre cloth to gently buff the surface. Its finely packed weave traps grime more effectively than regular cloths and won't scratch polished or matte finishes.
- **DO NOT** use chemical cleaners or abrasive sponges.

Warranties

Enjoy peace of mind with a Lifetime Warranty on Tapware & Shower structural components, including mixer cartridges. Finishes vary by product, including up to 10 years on Tapware, and 5 years on Spouts, Showers and Accessories.
